EDUCATION

University of Connecticut Storrs, CT,

Expected May 2028

Bachelor of Science in Materials Science & Engineering

TECHNICAL SKILLS

Manufacturing/ Quality: Six Sigma (DMAIC), Process Documentation, Process Validation, Work Instructions, Quality

Materials: Corrosion Testing, Failure Analysis, Metallography, Microstructure Analysis, Surface Roughness, ASTM Testing

Software: Minitab, MATLAB, Python, Microsoft Project, Visio

PROFESSIONAL EXPERIENCE

Entegris | Danbury, CT

Jan 2026 – Aug 2026

R&D Science & Engineering Intern/Co-op (Extended)

- Led root cause investigation of recurring manufacturing defects, implementing corrective actions that reduced estimated scrap by ~12%.
- Applied Six Sigma (DMAIC) methodologies to reduce process variability by 6%, improving manufacturing measurement consistency and repeatability.
- Installed and qualified inspection equipment for manufacturing quality assurance, enabling standardized surface-roughness characterization of high-purity gas cylinders.
- Designed and standardized process documentation for a high-purity gas system, collaborated with cross-functional teams on equipment design and scale-up and, led the request-for-quotation (RFQ) process for new system components.

Institute of Materials Science & Sustainability | Storrs, CT

Aug 2025 – Present

Materials Engineering Research Assistant

- Performed ASTM corrosion testing to qualify material performance and support quality-driven material selection for manufacturing applications.
- Analyze corrosion-rate data for 10+ alloy variants; deliver technical recommendations for material selection based on reliability and performance.

Institute of Materials Science & Sustainability | Storrs, CT

May 2025 – Aug 2025

Metallurgy Research Assistant

- Prepared metallographic specimens via heat treatment, grinding, and polishing, exceeding industry QC standards through rigorous process control.
- Evaluated steel microstructures to identify processing-property relationships supporting material optimization and production quality improvements.

Hugo P. Quintero Labs | Storrs, CT

Sep 2024 – Feb 2025

Materials Research Intern

- Optimized data-analysis algorithms (MATLAB/Python), increasing processing speed by 30% and improving measurement accuracy by 15%.

LEADERSHIP & SERVICE

Senator – National Society of Black Engineers (NSBE), UConn Chapter

Apr 2025 – May 2026

- Represented 30+ engineering students at regional and national NSBE meetings while facilitating communication between members and executive leadership.

Student Tutor – UConn BRIDGE Program

Jun 2024 – Aug 2024

- Provided academic tutoring and mentorship to students transitioning into college-level coursework.
- Developed personalized learning strategies to support student success in foundational math and science subjects.

Member – UConn Metalworking Club

Fall 2026 – Present

- Engage in hands-on metalworking and fabrication projects.
- Collaborate with peers to apply materials science concepts to manufacturing techniques.
